

**What do you value
most about ultrasonic
antifouling?**

Enhanced fuel efficiency and vessel performance

A priority for

42%

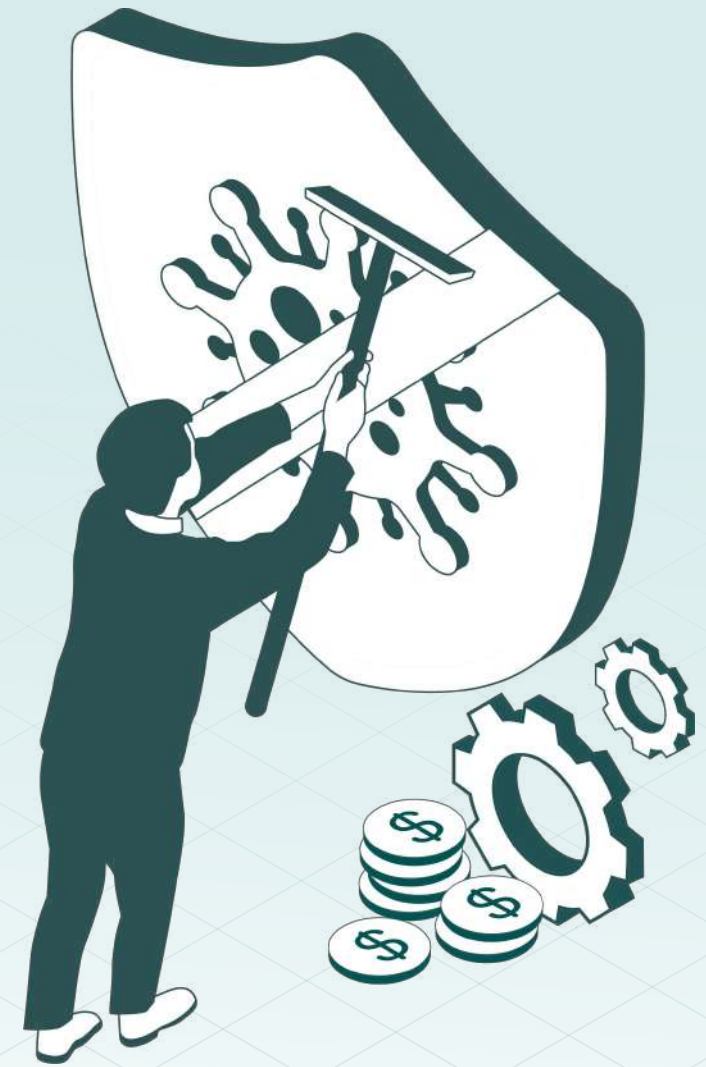

It's no surprise that mariners care about optimizing operations and cutting fuel consumption to improve overall vessel performance and make the most of every voyage.

Reduction in maintenance costs and hull cleanings

A priority for

46%

Nearly half of the respondents pointed out that reduced maintenance costs and fewer hull cleanings are key benefits. This really highlights the need for more cost-effective and less labor-intensive solutions.

Preventing invasive species transfer

A priority for

12%

It's surprising how low this figure is, suggesting that we might need to do more to educate people about the crucial environmental benefits of preventing invasive species transfer.

Your feedback drives us

USP DragGone™ delivers on these needs

Armed with your insights, USP DragGone™ is engineered to enhance fuel efficiency, cut operational costs, and help preserve
